**CCE Holding GmbH  
Environmental Policy  
approved by Mr. Martin Dürnberger and Mr. Jörg Menyesch,  
Co-CEO's CCE Holding GmbH  
on  
14 August 2023**

CCE Holding (CCE) offers international solar solutions ranging from commercial rooftop systems to large-scale ground-mounted systems. In addition, we are also engaged in the development of flexible energy storage solutions.

CCE is committed to operating its activities in a sustainable manner and to the protection of the climate, environment, and biodiversity.

Through our sole focus on renewable energy, CCE contributes to reduction in greenhouse gas emissions from the power generation sector by increasing the share of renewables in the energy mix.

CCE is committed to ensure the responsible use of natural resources and the prevention and reduction of negative environmental impacts like emissions, energy consumption, water consumption, and waste generation.

We are committed to operating in harmony with natural ecosystems and dedicate ourselves to the conservation and regeneration of biodiversity as we continue to expand our renewable energy portfolio.

*To meet these commitments, we will:*

- › Establish and maintain an Environmental Management System onto ensure the integration of environmental considerations into all aspects of our operations.
- › Report annually on GHG emissions for relevant projects.
- › Secure sustainable sourcing of energy, raw materials, products, and services with our environmental commitment in mind and through collaboration with suppliers that understand and share our values and commitments.
- › Reduce the carbon footprint of projects.
- › Ensure energy efficiency in our energy systems and solutions.
- › Reduce air emissions and noise.
- › Encourage the use of sustainable water sources and promote responsible water management practices in arid regions.
- › In line with SolarPower Europe and Birdlife, we meticulously identify suitable land for solar deployment, considering the potential environmental opportunities and challenges of utility-scale solar projects.
- › Encourage recycling and responsible disposal of waste materials by applying waste management in all activities.
- › Ensure responsible chemical management taking into account the life cycle of chemicals including handling, storage and disposal.
- › Ensure all environmental incidents are reported and implementing corrective actions when necessary.
- › Report our environmental performance in a transparent manner.
- › Raise awareness among employees and subcontractors about the importance of environmental protection.

We are adhering to applicable environmental laws, regulations, and industry standards.
